Pratt & Whitney is HIRING NOW!

Pratt & Whitney is a world leader in the design, manufacture and service of aircraft engines and auxiliary power units. It offers a broad product portfolio that includes commercial aircraft jet engines, commercial turboprop engines, military aircraft engines, business and general aviation jet engines, helicopter turboshaft engines.

Pratt & Whitney in Singapore is a global center of excellence with the most comprehensive service offering outside of the U.S. Pratt & Whitney companies operate in key industrial areas of Loyang, Seletar and Tuas, while the Singapore headquarters is a regional office for Pratt & Whitney.

Pratt & Whitney has been operating in Singapore for more than 30 years, making it one of the pioneers in the development of Singapore's world-class aerospace industry.

Job Openings – Looking for Full Time & Permanent Role:

TECHNICIAN (ENGINE BUILD)

Job Description

- Assist the cell leaders and workshop engineers in operational duties
- Perform disassembly, assembly, inspection and repair functions of engines, associated modules, parts, components and accessories
- Carry out housekeeping and other workshop activities as directed by the supervisors
- Comply with and adhere to Environment Health & Safety (EH&S) regulations, standards, requirements and procedures
- Maintenance of tooling and fixtures
- Actively support and participate in EH&S, Quality, Ethics and Continuous Improvement projects and initiatives
- Carry out any other duties as assigned.

Job Requirements

- Diploma, Higher NITEC or NITEC in Mechanical Engineering, Electrical Engineering or any other related/ relevant discipline
- At least 2 years work experience in disassembly/assembly/inspection or test in aviation industry
- Good working knowledge in Microsoft Office applications (MS Word, Excel and PowerPoint) and SAP
- Good interpersonal, written and verbal communication skills
- Keen learner and a good team player
- High level of integrity, accountability and drive to complete tasks
- Able to display Continuous Improvement competencies
- Self-motivated and able to work independently with a positive attitude towards change management
- Able to multi-task, work under pressure and thrive in a dynamic and fast-paced work environment
- 5 days work week, 2 Shifts (7.30am - 4.48pm & 4.15pm - 1.00am)

- Salary $2,000 - $3,000
- Work location: Singapore 509927

MACHINIST (TECHNICIAN)

Job Description

- Execute the standard repair processes properly for specific aircraft engine parts within the cell by applying the current approved technical data and standard work processes.
- Utilize machines/equipment/tools to carry out standard repairs.
- Solve technical issues and problems as appropriate when encounter in their daily work.
- Actively support and participate in EHS, Ethics and Continuous Improvement projects and initiatives.
- Assist the Operations Leaders and Assistant Foremen in their day-to-day operations to achieve production targets and corporate goals.
- Carry out SAP transactions and make necessary changes to works order in SAP.
- Carry out proper documentation.
- Perform cross-functional jobs within the department.
- Carry out any other duties as assigned.

Job Requirements

- Diploma, Higher NITEC or NITEC in Mechanical Engineering, Electrical Engineering or any other related discipline.
- At least 2 years work experience in disassembly/assembly/inspection/repair in the aviation industry.
- Competent in MS Office (Word, Excel, Access and PowerPoint).
- Possessing skills in machining/CNC programming/shot peening/CMM, will be an added advantage.
- Good analytical skills, able to grasp concepts, track and resolve issues quickly.
- Good organizational, interpersonal, written and oral communication skills.
- Possess a good and positive attitude and has high level of integrity and accountability.
- Always looking to continuously improve.
- Self-motivated and able to work independently and multi-task.
- Must be able to work under pressure and thrive in a dynamic and fast-paced work environment
- Experience in aircraft engine workshop practices and module operations procedures will be an added advantage.
- 5 days work week, 2 Shifts (7.30am - 4.48pm & 4.15pm - 1.00am)
- Salary $2,000 - $3,000
- Work location: Singapore 509927

MANUDACTURING TECHNICIAN (CNC MACHINIST)

Job Description

- Set-up, operate and maintain the CNC, Shot Peen, Media Finish, CMM or GOM machines.
- Perform manual deburring, polishing, or blending.
- Perform simple troubleshooting of machines.
- Read and follow standard operation procedures and work instruction.
- Perform an assessment of risk activities, take corrective and preventive actions.
- Compliance with Company Code of Ethics and Export regulation.
- Support and participate in EH&S, Quality & CORE activities (Customer Oriented Results & Excellence).
- Involve in continuous improvement and cost saving initiatives.

Job Requirements

- "O" Levels, NITEC, Higher NITEC or Diploma in Engineering or relevant disciplines.
- 1 year of relevant working experience in Machining, Shot Peening or CMM in either Manufacturing or Aerospace MRO environment. Open to consider Fresh Graduates.
- Ability to understand basic technical instructions and standard operation procedures (SOP).
- Comfortable with hands-on work to operate with equipment, tools, and machines.
- Basic oral and written English language skill.
- A curious and learning mindset – we provide on-the-job trainings and certifications.
- Willing to work on rotating shifts (Day & Night) and overtime on need basis.
- Relevant aerospace, manufacturing or precision engineering experience is a plus.
- 5 days work week, Shift 1- 7.30am - 4.48pm , Shift 2 - 230pm to 1148pm, Shift 3- 1030pm to 0748am
- Salary $2,000 - $3,000
- Work location: Singapore 509927

TECHNICIAN (INSPECTOR)

Job Description

- Performs visual and dimensional inspection of incoming and outgoing aircraft parts
- Responsible for incoming/ initial, in-process and final inspection of repairable parts to ensure conformance to related documents and required repairs
- Ensure parts are repaired according to the prescribed standards and procedures

- Understand current specifications involving inspection tolerances, limitations, and procedures established by the manufacturer of the product being inspected and other forms of information
- Responsible for conducting inspection in accordance with Regulatory approved technical data.

Job Requirements

- Diploma, Higher NITEC or NITEC in Mechanical Engineering, Electrical Engineering or any other related discipline
- Good communication and interpersonal skill and ability to communicate with all levels
- Good understanding of technical drawing
- Familiar with the relevant air worthiness and regulatory agencies requirements
- Thoroughly familiar with all inspection methods, techniques, practices, aids, equipment's and tools used to determine the quality of airworthiness of a part
- Proficient in the use of various types of inspection equipment and visual inspection aids
- Meticulous with an eye for details and adopts a hands-on approach
- Able to display Continuous Improvement competencies
- Self-motivated and able to work independently with a positive attitude towards change management
- Able to multi-task, work under pressure and thrive in a dynamic and fast-paced work environment.
- 5 days work week, Shift 1- 7.30am - 4.48pm , Shift 2 - 230pm to 1148pm, Shift 3- 1030pm to 0748am
- Salary $2,000 - $3,000
- Work location: Singapore 509927

TECHNICIAN (AERO-ENGINE COMPONENTS)

Job Description

- Repair & overhaul of the aero-engine components by benching, blasting, brazing, blending, polishing, welding, machining or using other required mechanical skills.
- Follow procedures and guidelines to meet operational requirements and quality standards.
- Support and participate in the EH&S programs and activities within the company.
- Report any incidents, hazardous conditions, and emergencies to the supervisor.
- Perform an assessment of risk of the activities and take corrective and preventive actions.

- Attend EH&S training programs and takes personal responsibility to ensure safety adherence
- Support the continuous improvement programs and CORE (Customer Oriented Results & Excellence) activities within the company.

Job Requirements

- GCE ‘N’, ’O’ Level, NITEC, Higher NITEC or Diploma in Engineering or relevant disciplines.
- • Fresh graduates or mid-careers with keen interests to join the Aerospace industry is welcome.
- Ability to understand basic technical instructions and standard operation procedures (SOP).
- Comfortable with hands-on work to operate with equipment, tools and machines.
- Basic oral and written English language skill.
- A curious and learning mindset – we provide on-the-job trainings and certifications.
- Willing to work on rotating shifts (Day & Night) and overtime on need basis.
- Relevant aerospace, manufacturing or precision engineering experience is a plus.
- 5 days work week, 2 shifts (7.30am - 5.00pm & 7.30pm - 5.00am)
- Salary $1,700 - $2,300
- Work location: Singapore 797560

QUALITY CONTROL INSPECTOR

Job Description

- Performs visual and dimensional inspection of incoming and outgoing aircraft component parts
- Ensure parts are repaired according to the prescribed standards and procedures
- Responsible for incoming/ initial, in-process and final inspection of repairable parts/ components channelled into the cell and through repair process to ensure conformance to related documents and required repairs
- Have available and understand current specifications involving inspection tolerances, limitations, and procedures established by the manufacturer of the product being inspected and with other forms of information
- Responsible for conducting inspection in accordance with Regulatory approved technical data.

Job Requirements

- Minimum GCE ‘O’ / ‘A’ Level or Diploma in Mechanical / Manufacturing / Quality Management
- Minimum 1 year working experience
- Acceptable communication and interpersonal skill and ability to communicate with all levels
- Good understanding of technical drawing
- Familiar with the relevant air worthiness and regulatory agencies requirements

- Thoroughly familiar with all inspection methods, techniques, practices, aids, equipment's and tools used to determine the quality of airworthiness of a part
- Proficient in the use of various types of inspection equipment and visual inspection aids
- Meticulous with an eye for details and adopts a hands-on approach.
- 5 days work week, 2 shifts (7.30am - 5.00pm & 7.30pm - 5.00am)
- Salary $1,700 - $2,500
- Work location: Singapore 797560

WELDER

Job Description

- Repair/ overhaul aero-engine components by benching, blasting, brazing, blending, polishing, , cold working, TIG welding (preferred) or using other required mechanical skills
- Follow established procedures and guidelines to form a variety of simple, manual tasks that form part of a production process, manufacture products according to production specifications and schedules, volume, cost, and wastage targets, and quality standards
- Support and participate in the EH&S programs and activities within the company
- To report on all incidents (injuries, illnesses, near misses, spills etc.), hazardous conditions, and emergencies to his/her supervisor
- Responsible for performing an assessment of risk of his/her activities, taking corrective and preventive actions
- Attend EH&S training programs and takes personal responsibility for safety
- To comply with EH&S regulations/policies/programs/rules and use personal protective equipment (PPE)
- To participate in audits and inspections as and when required
- To provide a quality product that satisfies our customers' needs and expectations the first time, every time!
- Emphasizing a total quality management process which provides accuracy, and strict compliance with agency regulations and customer requirements, giving the highest degree of confidence; understanding that meeting the requirements of the next employee in the work flow process is just as important as meeting the needs of external customer.
- Improving the systems of production to generate continuing quality and productivity improvements with full accountability and responsibility.
- To comply with the Company Code of Ethics.

Job Requirements

- GCE 'O' Level, NITEC and Diploma in Precision/Aerospace/Mechanical Engineering
- Training will be provided
- Willing to work on rotating shifts.
- 5 days work week, 2 shifts (8.00am - 5.00pm & 8.00pm - 5.00am)

- Salary $1,800 - $2,500
- Work location: Singapore 508916
